January 22, 2019;

Dear G-O-T-L Resident:

NOTICE: Start of Ashtabula Co. Dept. of Environmental Services "S. R. 531 Waterline Replacement"

Affected Area: 5209 to 5536 Lake Road, East Geneva-on-the-Lake

Please be advised that construction activities have commenced on the ACDES "S.R. 531 Waterline Replacement" project. The project consists of approximately 3,400 feet of 12" C909 PVC waterline and twelve (12) new fire hydrant assemblies that will be installed in southern right-of-way of Lake Road, East between addresses 5209 and 5536. We anticipate the installation of this replacement waterline will take approximately four (4) months to complete; including pavement replacement.

We request that you advise D. B. Bentley Inc. of any privately installed underground facilities on your property by calling 440-352-8495.

Upon the completion of the construction and disinfection of the new waterline all side streets and service connections will be transferred to the new main. You will be notified in advance via a "door hanger" of any planned water service interruptions necessary to perform the required service transfers and water main tie-ins.

During construction two way traffic and access for emergency vehicles, school buses, US mail and garbage trucks will be maintained.

A pre-construction videotape and photographs of the existing site conditions has been made to assure that restoration is performed properly. Please note all existing property pins located in the work areas will be located and documented to assure proper replacement should they be disturbed during construction activities. If you any questions specific to the waterline installation or scope of work, please contact the Ashtabula County on-site inspector during construction. For any other questions or concerns please call 440-352-8495.

We appreciate your patience during the construction of this important waterline improvement project.

Sincerely,

Doug Routzahn

Doug Routzahn
